Project Description

Description: CPEC is already managing (on a non-profit platform) a project integrating handheld computers, customized database software, digital cameras and camcorders, and GIS software to capture information on physical assets distributed over a wide area. The technology may have applications in vertical markets such as property management, public utilities, transportation, and insurance. The technology package could have commercial value and can definitely be packaged as a "social entrepreneurial opportunity." The technology creates databases and maps of physical conditions, including photos and videos. The next technologies to incorporate are wireless data transmission and GPS (global positioning satellite data).

Attached Files:

Deliverable: A business plan that can be used to seek funding from VC firms in commercial applications or foundations (and others) for non-profit applications. CPEC has some contacts in both arenas.

Ownership: Negotiable.

Delivery Date: 04/01/01 12:04 A.M.
Company uses U.S. Eastern Time
